HydroBalance

Why Choose HydroBalance Coil Cleaners? ***For Better Results, Get A Better Coil Cleaner.***

The majority of the cost for inferior products is shipping, not the active cleaner ingredients themselves.

You've heard it before and it's still true—you get what you pay for. It's the same with coil cleaners. Manufacturers of inferior products dilute their cleaners with as much water as they can get away with. The price you pay may seem low—but not when you consider what you're buying isn't cleaning ingredients—it's water!

At HydroBalance, we have a more sensible (and we feel honest) approach. We formulate our cleaners with the amount of active ingredients necessary to get the job done... in one application. We figure our customers have more to do than stand around waiting for a coil cleaner to work after the second or third application.

Recently acquired by Aspen Pumps Group, a leading global manufacturer of air conditioning and refrigeration after market products, HydroBalance marks an important step in Aspen's US manufacturing and sales capabilities.

Product range

CONDENSER CLEANERS: Ideal for outdoor air-cooled condensers, these solutions deliver concentrated power to effectively clean even the most stubborn equipment.

6-7

EVAPORATOR CLEANERS: Developed for indoor evaporator cleaning, these formulations guarantee prolonged equipment life and uphold fresh indoor air quality (IAQ).

8-9

UNIVERSAL CLEANERS: These universal cleaners effectively clean both condenser units and evaporators, providing powerful cleaning without the harshness often associated with typical condenser cleaners.

10

SPECIALIST CLEANERS: Specialist items comprise a diverse range of dynamic products, developed specifically for technical professionals.

11-18

LUBRICANTS: Complete range of HVAC lubricants, meticulously packaged, and shipped in double-walled cardboard boxes.

19-23

REFRIGERATION & ICE MACHINES: Targeted products for effective cleaning applications.

24

DRAIN: Highly effective professional-grade products to ensure optimal drainage maintenance.

25-27

ACCESSORIES: Convenient tools designed to simplify daily tasks and improve efficiency.

Easy Steps For Fresh Indoor Air

#1 Clean the System

Use Zip Clean (ZC-02) or Enviro-coil (H-EC01) Used to safely clean cooling coils, removing greasy film, lint, mold, mites and other foul smelling debris. Restores the operating efficiency and saves money by reducing power consumption.

#2 Destroy the Source of Odors

Use Coil & Duct Spray (H-9532) Highly effective in eliminating odor causing microorganisms as well as those associated with mold, mildew, and bacterial growth. Spot treat coils, pans, and registers with Coil & Duct Spray registered by the EPA for use in HVAC systems.

#3 Long Term Treatment

Use Ever-Clean (H-9932) to continually wash away airborne particulate and other contaminants for 2-3 years. Also contains preservatives that protect it from deterioration caused by mold and bacterial contamination common in air conditioning systems.

#4 Drain Pan Treatment

Use Sta-Clean Strips (use appropriate size) Sta-Clean Drain pan Strips is an EPA registered product that controls foul odors caused by mildew, fungi, bacteria, algae, and slime. Maintains clean drain pans for 6 months, reducing the risk of clogged drains and water overflows which could cause structural damage.
